

# VOTE “YES” ON H.R. 4763

Financial Innovation and Technology for the 21st Century Act (FIT21)

A vote for FIT21 is a **vote for the more than 50 million Americans who own or invest in digital assets.**

**1 in 5** registered voters in battleground states consider **cryptocurrency** a major issue in the 2024 election.

A vote for FIT21 is a **vote for pro-consumer guardrails for the digital asset industry:**

- FIT21 gives the SEC oversight of fundraising activities and the trading of certain digital assets. This increases market transparency and makes more disclosure information available to American investors so they can make better-informed investment decisions.
  - FIT21 assigns market surveillance and enforcement roles between SEC and CFTC jurisdictions for the digital asset sector to ensure greater transparency and close jurisdictional gaps.
- 
- A vote for FIT21 is a **vote for rooting out bad actors:**  
The status quo isn't working. Clear compliance rules for digital asset companies ensure consumers are protected and make it easier for regulators to spot bad actors.
  - A vote for FIT21 is a **vote to provide rules to industry:**  
FIT21 creates a comprehensive regulatory framework for digital assets where the SEC and CFTC can oversee the sale, trade, and custody of digital assets for consumers.
  - A vote for FIT21 is a **vote for a better, more democratic internet for all:**  
Digital asset innovators are creating technologies to build a better financial services system and a better internet.
- 

**1 in 3** registered voters in swing states believe that crypto levels the playing field for building **financial health**.

**Blockchain Association urges a “YES” vote on the future of digital assets.**
